

VITENSENTER NORDLAND

- AN INTERACTIVE SCIENCE MUSEUM -

What is Vitensenter Nordland?

This is an interactive science museum that invites you to explore the world of science and make exciting discoveries.

Your invitation to explore!

At Vitensenter Nordland you can experiment, explore and gain many insights about natural phenomena, technology and mathematics. The exhibits are interactive – they are designed to encourage you not just to look, but to touch and do hands-on experimentation.

A journey in the Planetarium

You are invited to learn about the different planets of our solar system, the stars, the constellations and galaxies. What is a black hole? How are the Northern Lights created? Join us on an unforgettable journey into space!

Sustainability and our environment

The science museum has a strong focus on sustainability, on the changing climate, and on the environment we share. Exhibits cast light on what we eat, and let you gain new insights into sustainable agriculture, recycling, composting and much more.

Many exciting activities

All in all, Vitensenter Nordland covers 3600 m² (38,750 square feet) – and there are so many activities for you to explore! The museum is divided into various areas so you can explore different topics.

Welcome to exciting activities for the whole family.
