

# VISIT THE SALMON

## NORWEGIAN AQUACULTURE CENTER - FISHFARMING

The Norwegian Aquaculture Centre wish you welcome to the fascinating world of the salmon and the lovely coastal society Toft!

The Norwegian Aquaculture Center was one of the first aquaculture centers in the country and is today one of the most visited centers.

The Sea and fishing tradition has for thousands of years been the primary source for food for the people at the coast of Norway. Here you will get an insight into modern aquaculture and fish farming, which is the second largest export product from Norway.

In the beautiful surroundings along the Toftsundet strait, you visit a real fish farm and get a close-up experience with the Salmon fish farming process. Their professional guides show you the fish farm, the mini aquarium, the underwater camera and the feeding. Tour will take ca. 1 hour.

The Centre also has an indoor exhibition that consists of aquariums, a section which highlights the history of Norwegian fish farming industry, as well as the local history at destination.

**Norsk Havbrukssenter is open year around!**

**Guided Tour (fish farm) - daily:** 11 am and 13:30 pm
