ABOUT

Explore a Hidden Underground World on a Guided Cave Tour in one of Norway's most unique caves for exploration.

Formed between 400,000 and 10,000 years ago, the cave features deep gorges, narrow passages, marble corridors, and tight crevices – as well as large chambers with impressive acoustics and fascinating geology. Inside the mountain, you'll also find running water and even a natural fishpond. A great experience for moderately active to active visitors.
