## Distance from town

159 km

## Environmental certifications

ECO-lighthouse

Helgeland

## ABOUT

Svartisen is the second largest glacier on the Norwegian mainland, and Engabreen is an impressive glacier arm that reaches almost all the way down to the fjord.

This glacier trek is a unique opportunity to experience up close the dense glacial ice, the amazing ice formations that sometimes look like sculptures, and the deep crevasses in the glacier.

Engabreen is situated Meløy municipality and is easily accessible from route Fv17. From Holandsvika the shuttle boat MS "Isprins" regularly crosses the fjord towards Svartisen. From the quay on the other side, we have a 3 km walk along a gravel road up to the glacier.

During the summer, daily excursions start every morning. In June and July, you can also join a glacier trek under the midnight sun! This makes your glacier adventure even more amazing.
