Must have good shoes and clothing according to the weather.

Dogs are only if the trip is booked exclusively for your group.

Distance from town
62,7 km

ABOUT

From late September to early April, northern lights activity is high in Helgeland. Our safaris are based around well-chosen viewpoints with little light pollution, beautiful natural surroundings, and deep silence. We use different locations on both sides of Saltfjellet and the Arctic Circle – westward toward the coast and eastward toward the Swedish border – to give you the best possible chance of a great northern lights experience.

Expect campfires, help with your camera or phone if you're new to photographing the aurora, something warm to drink, snacks, transport, and experienced guides full of local knowledge. See the northern lights with stunning backdrops like coastal mountains, cave openings, glacial potholes, and frozen lakes. Experience absolute darkness and complete silence. Share unforgettable winter moments by the fire with us.
