### Price

Available on request.

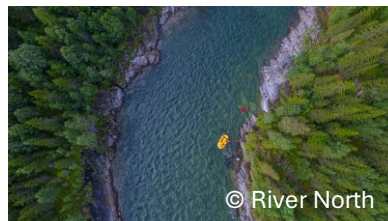

### ABOUT

Join RiverNorth for a peaceful river journey through the spectacular landscapes of Grane in Southern Helgeland. Instead of high-adrenaline whitewater rafting, this experience focuses on slowing down and enjoying the natural surroundings as the raft gently follows the flow of the river.

Guided by professional river guides, guests float along sections of the **Austervefsna or Svenningelva rivers**, depending on water levels. These rivers wind through deep forests, river canyons and untouched wilderness, offering a unique perspective that can only be experienced from the water.

Along the way there is time to relax, enjoy the scenery, take photos and even jump in for a refreshing swim in the calm sections of the river.

This soft-adventure activity is suitable for families, couples, groups and travellers who want to experience Helgeland's nature from a new perspective – at a calm and enjoyable pace.
