Per group. Up to 4 groups per day  
(multiple departures available).

## Duration

1,5 hours

## Level

Grade 1

## Age limit

10+

## Included

- Kayak and guide

## ABOUT

Blue ice, alpine peaks, and dramatic fjord landscapes set the stage for an unforgettable kayak experience.

Paddle across the glacier lake Engabrevatnet, surrounded by steep mountains and sheltered waters, with breathtaking views of the magnificent Engabreen glacier. Together with your experienced guide, you will glide across calm waters toward the outlet of the glacier river — immersed in Arctic nature at its most spectacular.

Along the way, your guide shares the story of the glacier: how its powerful movement and erosion have shaped the surrounding landscape over thousands of years, creating the unique scenery you experience today.

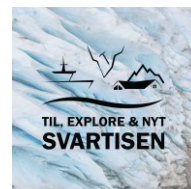

The adventure begins at Brestua, where all necessary equipment and safety instruction are provided. You will receive life jackets, paddles, and a thorough introduction to basic paddling techniques before heading out. No previous experience is required.

Our stable double kayaks (duo kayaks) are designed for comfort and safety, making this tour suitable for beginners and those new to kayaking.

A close-to-nature experience combining knowledge, tranquility, and Arctic grandeur.
